Washington D.C. 20515

January 30, 2023

Dear Speaker McCarthy, Chairwoman McMorris Rodgers, Chairman Westerman, Chairman Lucas, Chairman Thompson, and Representative Graves,

Our organizations proudly supported the policy framework that the Energy, Climate, and Conservation Task Force released last summer as a part of the Commitment to America. We hope to see this plan put into action under your leadership.

The climate is changing, and Americans of all backgrounds want effective, commonsense solutions. Solutions that enable and enhance innovation while increasing American production of energy, goods and commodities will deliver global emissions reductions and lower energy costs for American families, while charting the path forward to a brighter, cleaner future.

In the 118th Congress, we look forward to your leadership in streamlining onerous regulations holding back all energy development, encouraging clean energy innovation, bolstering domestic supply chains, and unleashing the power of American energy producers to compete on the world stage against the likes of China and Russia.

We appreciate your leadership in protecting our environment and bolstering our economy, and we look forward to working together to reduce emissions, make our energy sector more reliable, and lower costs for consumers.

Sincerely,
